PREFACE

This plan is prepared as a supplement to the National and Northern Rockies Geographic Area Mobilization Plans. Its purpose is to provide a ready source of information for those involved in Fire Management activities within the Grangeville Interagency Dispatch Zone.

Additional information is available in the National and R-1 Mobilization Plans, FSM 5100 and FSM 5700 Idaho Department of Lands Fire Mobilization Plan, and Clearwater and Nez Perce Forest Fire Plan; all on file at the Grangeville Interagency Dispatch Center.

It is recognized that there may be items contained within this plan that remain from the legacy plan and may not properly reflect current direction for the new organization and could appear to address National Forest Policy and not that of Idaho Department of Lands. Reviewers are encouraged to provide the Grangeville Interagency Dispatch Manager with suggested corrections and additions for future editions.

CHAPTER 20

21 ORDERING CHANNELS/COST CODING

21.1 ORDERING CHANNELS

Grangeville Interagency Dispatch may order resources directly from their neighbor, Coeur d'Alene Interagency Dispatch. Orders should be placed with CDC prior to placing the order with NRCC.

Under the Snake-Salmon Fire Management Agreement (the Tri-Region Agreement) initial action, local suppression support, and prescribed fire resources may be ordered from and provided to the Payette and Wallowa-Whitman Forests by GVC. The “closest forces” concept will be utilized regardless of administrative boundaries.

Umatilla National Forest and Nez Perce shared resources can be ordered direct between OR-PIC and ID-GVC by telephone. Hard copies of orders can be transmitted by computer (ROSS) or by fax. These resources include the Frazier Helitack/Rappel module and Nez smokejumpers, Air Attack Platform with ATGS and a Type 3 helicopter with module.

Ordering for initial attack and prescribed burn actions between the Nine Mile District on the Lolo National Forest and the Powell District on the Clearwater Forest can occur under Intra-Agency Agreement #07-IA-11011600-011. All other orders between these Forests must go through NRCC.

21.2 ORDERING PROCEDURES

Districts and Areas are responsible for having sufficient initial attack resources available to handle the expected fire load considering fire danger, time of year, and available funds. Proper use of all available resources will provide the greatest capabilities. Forest draw down levels are in the Fire Management Action Plan.

Movement of resources between units and requests for shared or off-zone resources will be coordinated through the Zone Dispatch Center. GVC will initiate actions to fill in behind committed resources considering total Zone capabilities.

All orders for off District or off Area resources must be placed with GVC. An NFES 1470 Resource Order Form will be used to order all resources except smokejumpers which are ordered on a Smokejumper Request (R1-FS-5700-3a).

Requests will be segregated by resource type: aircraft, overhead, equipment, crews, and supplies. Specific requests for the incident will have request numbers such as A-1, A-2, (aircraft orders) or O-1, O-2, (overhead orders).

ORDERING PROCEDURES (CONT.)

Request numbers for all of a District's Misc A/B/C/D fires throughout the season will be sequential, i.e. will not restart with S-1 or E-1 for each individual fire.

GVC will place orders upward through the ROSS Program.

An incident/project order number will be placed on all resource orders (Block 3). The number will begin with the letters ID (Idaho) followed by -CWF or -NPF (Clearwater or Nez Perce Forest) and end with the number assigned by Wildcad to that fire.

Idaho Department of Lands (IDL) and Clearwater-Potlatch Timber Protective Association (CPTPA) incidents will be assigned incident/project order numbers composed of ID followed by the unit's three letter designator followed by the unique fire number assigned by Wildcad.

CPTPA	ID-CTS-(unique fire number)
Craigmont Area	ID-CMS- “
Maggie Creek Area	ID-MCS- “

21.3 RESOURCE ORDER REQUEST NUMBERING

21.3.1 Initial Attack – ABCD Miscellaneous

At the beginning of each season logistics will establish incident order numbers in ROSS for NPF and CWF ABCD Misc fires. There will be one incident established for the CWF and one established for the NPF. For these ABCD Misc incidents created in ROSS, the districts as well as GAC and GVC will be assigned blocks of numbers that will be consistent for all resources. (ie Equipment, Overhead, Supply, and Aircraft). When new incidents are created in ROSS, ordering will begin at 100 to allow for internal office use of card stock for IA ordering.

The blocks assigned will be:

ID-CWF-*****

Grangeville Dispatch	0001-0999
Palouse RD	1000-1999
North Fork RD	2000-2999
Lochsa RD	3000-3999
Powell RD	4000-4999
GAC	5000-5999

ID-NPF-*****

Grangeville Dispatch	0001-0999
Salmon River RD	1000-1999
Clearwater RD	2000-2999
Moose Creek RD	3000-3999
Red River RD	4000-4999
GAC	5000-5999

21.3.2 Extended Attack – Expanded Dispatch

When a fire has gone into extended attack and an expanded dispatch organization has been established, GVC will create a set of “request blocks” starting at 1000 for crews, equipment, overhead, and supplies for use by expanded dispatch.

21.4 FIRE COST CODING

Fire incident codes are assigned to all fires. ABCD fires will be lumped together:

P1EKS6 (0105) - Clearwater Forest

P1EKT5 (0117) – Nez Perce Forest

Suspected human caused fires with a reasonable probability of identification and repayment, and class E and larger fires will receive individual fire incident codes. These will be assigned on an individual basis by the Grangeville Dispatch Center using the FireCode System and documented in the Incident Order Numbers binder.

When creating a FireCode for an incident, a Dispatcher can chose whether the code will be reimbursable (FS will bill the State), or billable (FS may potentially bill another party for the trespass/arson/etc.). Reimbursable fires in Idaho must have exceeded the \$5,000 threshold identified in the Annual Operating Plan. Any changes to the initial Special Requirements section, including a decision not to bill the State, must be documented in the FireCode Program.

Class E and larger fires will receive individual fire incident codes. When an incident is transferred to GVC by any of the Tri Region Agreement partners, the fire code will remain the same and the incident will not be assigned a fire code unique to Region 1.

When Federal resources are assigned to a State of Idaho or CPTPA incident, a FireCode will be generated by GVC and assigned to their fire. For Forest Service resources responding to this fire, **PN** will be the first two digits of the job code followed by the FireCode. Personnel responding to this incident would use 1502 as the override code on timesheets, travel vouchers and other payment documents.

All Off-Zone resource orders will have individual management codes assigned.

21.5 DISPATCHING PROCEDURES

Dispatchers will follow specific direction from Duty Officers and the guidance of the Grangeville Interagency Dispatch Standard Operating Procedures. Additional direction is contained within the Regional and the National Mobilization Guides and the preplanned dispatch block cards.

Fire assignments will consider all qualified individuals who have passed the physical fitness requirements for the job assignment.

Off Zone assignments will be made by GVC from the availability list. Individuals must be issued a Fire Qualifications Card before leaving on any fire assignment.

During times when resources are limited, the Dispatch Coordinator will communicate release priorities for shortage category resources with the Duty Officers.

22

OVERHEAD/CREWS

22.1

OVERHEAD MOBILIZATION AND DEMOBILIZATION

Communications for mobilization and demobilization will be through established channels.

Availability for fire assignment is reported through ROSS. Duty Officers will report availability of personnel on their District or Area and can do this on a near real-time basis. Persons shown available in ROSS must be ready to accept a 14-day assignment at the time they are called.

If an individual is not shown as available in ROSS, GVC will not receive an order through the system for that person and an assignment opportunity may be missed.

All personnel should carry photo identification while on assignment to facilitate mobilization/demobilization procedures via commercial airlines.

Per 5109.34, Chapter 25.2 “Refer to Host Agency Operating Guidelines on specific guidance on use of all cell phones. All cell phones and satellite phones should be procured through the incident agency. Use of personal or home unit cell phones and satellite phones will not be reimbursed.”

22.1.1 MOBILIZATION OF IDL PERSONNEL

Requests for IDL and CPTPA firefighters, crews, equipment, and overhead are made through the IDL Area Supervisor or the CPTPA Fire Warden. Fax a copy of the completed resource order to the providing Area Supervisor.

Orders for IDL resources may be placed directly with GVC by Eastern Great Basin Coordination Center (UT-EBC). Only IDL resources may be dispatched to these orders from UT-EBC. GVC can place orders for State resources for IDL incidents directly to UT-EBC as well. When placing orders

to UT-EBC, please use the "special needs" section in ROSS to record that this is a "state resource to state resource" request for IDL.

22.1.2 MOBILIZATION OF BLM PERSONNEL

To dispatch BLM personnel, call in the following order:

Mike Vanderpas
Kristen Sanders
Robin Boyce

If unable to reach anyone on the list above, you may contact an available person direct.

Fax a copy of the order to Mike Vanderpas.

22.1.3 MOBILIZATION OF ADs (Federal Direction)

To dispatch AD Overhead, the following must be completed:

- I-9, Employment Eligibility Form (usually on file after 1st assignment of yr)
- W-4 (if an AD has previously signed up, these will already be on file)
- Casual (AD) Hire Information Form
- Incident Behavior Form (once per year and AD maintains copy)
- OF-288, Firefighter Time Report (top section, Column A 1-8 completed)

A copy of the last three must accompany the AD to the incident.

Also, an AD must have SOS training, must have taken the work capacity test at the required level for their position, and must have been issued a letter of authorization in place of form OF-346 through AI Wisdom if they are to drive Agency vehicles.

22.1.4 MOBILIZATION OF NEZ PERCE TRIBE PERSONNEL

Requests for NPT Overhead will come through GVC, but the Nez Perce Tribe will dispatch their own resources. Call the main Lapwai office to be directed to the Duty Officer. Let him/her know that you will be sending an order. If the order is in ROSS, forward it using the "Other Resources" tab of the pending request screen. The Tribe will let GVC know that the order has been filled. Nez Perce Tribe will arrange travel to the incident in addition to procuring meals for their personnel.

22.2 CREWS

All crew members dispatched will be weighed and a manifest will be completed for each crew.

Orders for Type 2 crews will rotated as prescribed in the Grangeville Interagency Type 2 Crew plan, included in Chapter 60.

22.2.1 MOBILIZATION OF NEZ PERCE TRIBE CREWS

As with Overhead orders, GVC will route orders for Nez Perce Tribe crews to the Tribal Fire Office in Lapwai. They will fill the order and arrange transportation to the incident. Once the order is filled, insure that a copy of the crew manifest is received and forwarded to NRCC or other ordering office.

22.2.2 MOBILIZATION OF GRANGEVILLE INTERAGENCY CREWS

Reference the Grangeville Interagency Type 2 Crew Dispatch plan included in chapter 60.

22.2.3 MOBILIZATION OF ICIO CREWS

Requests for Idaho Correctional Institution Orofino (ICIO) crews will be placed through GVC to Kevin Korbel (first) or Howard Weeks at CPTPA. They will provide a manifest of the crew.

23 EQUIPMENT/SUPPLIES

23.1 MOBILIZATION

Orders for supplies and equipment will be placed with the Grangeville Dispatch Center. All items for fire cache items must include the NFES number. Items destined for State or CPTPA incidents will be placed with the Coeur d'Alene cache unless other arrangements are approved by IDL.

23.1.1 OUT-OF-AREA ENGINE DISPATCHES

The dispatch procedure will be: Agency owned equipment, Cooperator equipment, Best Value contractor and EERA. EERA contracts are not expected to be executed until such time as Agency, Cooperator, and Best Value equipment sources have been exhausted.

Out-of-area requests for the following contracted equipment will be filled utilizing the instructions for best value equipment (DPL = Dispatch Priority Lists):

Engines	Water Tenders (Support)
Soft Tracks	Water Tenders (Tactical)
Pumper Cats	Skidgines
Faller Modules	GIS Units
Clerical Support Units	Refrigerated Trailer
Tents	Mechanic w/Service Truck
Gray Water Truck	Transport
Mobile Laundry	Handwashing Station (Portable)
Potable Water Truck	Bus, Crew Carrier
Weed Washing Unit	Tractor Plow
Toilets (Portable)	Communications Trailer
Handwashing Station (Trailer Mounted)	Excavators
Dozer/Tractor Plow/Transport (piloted in Region 8 in 2009)	

More information can be found in the National Interagency Dispatch Standard Operating Guide for Contracted Resources at:

[http://www.nifc.gov/nicc/logistics/references/National SOG Contracted Resources Guide.pdf](http://www.nifc.gov/nicc/logistics/references/National_SOG_Contracted_Resources_Guide.pdf)

For USFS Acquisition support during fire season for buying team, purchasing, or procurement, contact first Kathy Anderson, the AQM Zone Supervisor/Coordinator: Office 208 765-7261.

In the event that you cannot reach her at any of the phone numbers listed, you may then contact Deb Gerfen, our local AQM person.

23.1.2 REQUESTS FOR MOTORIZED EQUIPMENT IN WILDERNESS

Requests for power equipment use in Wilderness will originate with the Incident Commander and be relayed to the District Ranger with reasons for request. The Dispatcher/Fire Duty Officer will document the request and reasons in the daily log. Approval will come from the District Ranger.

Use of power equipment will be limited to the specific request. After the task has been accomplished, non-mechanized equipment will be used for suppression.

The District Ranger will keep Forest Supervisor and Public Information Officer informed of any power equipment use in wilderness.

23.1.3 GEAR PACK OUT AND RETRIEVAL IN WILDERNESS

Package gear compact as possible.

Try to equalize weight in each gear bag.

Leave gear far enough from trails to not spook stock or encourage pilfering.

Flag all gear and flag from trail to gear.

Leave gear in a convenient area for the packer to load.

Cover all cutting tools.

If gear is left on Selway River for raft pickup, leave near quiet water.
Streamers should be placed so sighting can be seen from a long distance.
Place streamers several hundred yards upstream from gear.

Flagging/streamers will be removed and packed out when gear is retrieved.

23.2 FOOD SERVICES

Grangeville Dispatch can arrange for firefighter meals as requested by Duty Officers. Direction provided by Agency policy, and Geographic Area and National Mobilization Guides will be followed.

24 AIRCRAFT OPERATIONS

Air operations are hazardous and shall be managed only by trained personnel of demonstrated ability and the training necessary to safely operate the equipment. The R1/R4 Aviation plan and the IDL Aviation plans are posted on the Grangeville Interagency Dispatch Center web site for convenient user reference and guidance.

24.1 AIRCRAFT MOBILIZATION

All information regarding tactical aircraft mobilization/demob will be relayed via telephone. All information regarding administrative aircraft travel will be relayed by telephone and an Aircraft Flight Request/Flight Schedule. COMMIT messages will be posted in DMS to note changes in the status of National Resources.

24.2 HELICOPTER STANDARDS IN WILDERNESS

Helicopter use in wilderness can be approved for fire emergency situations. Non-mechanized methods will be the preferred alternative.

Helicopter requests are routed to the GVC from the Ranger District.

Helispot construction will be kept to a minimum. Before constructing a helispot, consider the following alternatives:

Walkout/pack out

Packstock

Helicopter long line (retrieval limited to trained personnel)

Jet boats on the Main Salmon River

Heli-rappelling

If necessary to construct a helispot, the following guidelines should be observed:

1. The Fire Duty Officer will ensure that the construction of the spot has approval of the District Ranger or Forest Supervisor.

2. Incident Commander will follow guidelines in the Northern Region Minimum Impact Suppression Tactics Guideline, Aviation Use Guidelines.

25 **INTELLIGENCE**

25.1 **ICS-209**

All large fires are to be reported to the Grangeville Dispatch Center on an ICS-209 form by 1800 daily. A unit or Incident Management Team may input the report directly into the 209 program or request GVC to complete the data entry. If a unit or IMT inputs the report directly into the 209 program, they should notify GVC once data entry is completed daily.

The ICS-209 is submitted via DMS by the agency that has protection responsibility for the incident regardless of who administers the land. Large fires are classified as 100 acres or larger in timber; 300 acres in grass or brush fuel types, or anytime a Type 1 or a Type 2 Incident Management Team is assigned. The ICS-209 is required daily until the incident is contained – this will be the “final” ICS-209.

An ICS-209 will be submitted to GVC for wildfires managed for resource or ecological benefit and where confine/contain or monitor is the strategy employed, when the event exceeds 100 acres in timber fuel types, or 300 acres in grass or brush fuel types. Subsequent reports are required when such fires reach 1,000 acres in size and every time the fire doubles in size thereafter, unless significant activity occurs (e.g. resource commitment or resource loss) or as determined by the GACC Mobilization Guide. An ICS-209 shall be submitted when a wildland fire managed for resource or ecological benefit moves from Stage I to Stage II as defined in the Wildland Fire Implementation Plan (WFIP).

A “final” ICS-209 will be completed when the fire is declared out (Block 20).

An ICS-209 will also be submitted for other significant events in which a significant commitment of wildland fire resources has occurred or when a Type 1 or 2 Interagency Incident Management Team has been assigned.

25.2 **DAILY SITUATION REPORT**

The Grangeville Dispatch Center will report daily (normally May 1 - October 30, or as long as the fire situation warrants) the fire situation to the Northern Rockies Coordination Center. This information will be assembled daily by the intelligence dispatcher based on information entered into WildCAD by the IA Dispatchers. Resource Availability will be obtained from the Resource Status Webpage.

The cut-off time for the day's activity will be at 1500 PDT.

25.3 RESOURCE STATUSING

Duty Officers will status available resources and identify the Duty Officers through the Resource Status Webpage every morning by 0900. If significant changes occur during the day, the information will need to be updated. If the Duty Officer cannot access the Resource Status Webpage, they will relay the information to their IA Dispatchers by 0900, who will enter the information. All Aircraft Resource Status information will be entered by the Aircraft Dispatchers.

25.4 ADDITIONAL REPORTS

25.4.1 FIRE REPORTS

Fires will be reported directly to Grangeville Interagency Dispatch. Reports should be as complete as possible and include enough information to allow proper action. Fires outside protection boundary should be handled in the same manner. The office receiving the report will relay the information to the responsible protection agency.

The Dispatcher will immediately contact the appropriate Duty Officer, relay the information and input it into WildCAD. The Duty Officer will provide direction and relevant decisions to the Dispatcher within management plan time standards.

Before leaving a Federal fire, the initial attack IC will complete the Fireman's Report, form R1-5180-4. This report is to be sent to the District FMO within 48 hours. It becomes the basis for the Individual Fire Report. The Individual Fire Report, form FS-5100-29, is to be completed within 5 days after fire is declared out. GVC will review the reports in Firestat and submit them to the data base at Kansas City.

Initial attack dispatchers will provide all relevant information to Area Fire Wardens to meet State standards for fire report submission.

25.4.2 ESCAPED FIRE SITUATION ANALYSIS

If a fire escapes initial action or burns out-of-prescription such as in an approved fire management area, an escaped fire situation analysis will be prepared by the responsible line officer.

25.4.3 ACCIDENT REPORTING AND NOTIFICATION

Forest Service direction

Reportable incidents involving Forest Service employees and/or occurring on National Forest lands or roads, must be promptly reported to the appropriate District AND the Grangeville Dispatch Center. Reportable incidents include “a fatality, injury, or illness of an employee or enrollee; or one or more private citizens die or death is likely, as a result of a Forest Service activity; or three or more employees, enrollees, and/or private citizens are hospitalized”. Further clarification of the accident notification criteria and process can be found in FSH 6709.12 Safety and Health Program Handbook Chapter 30.

A copy of the Preliminary Incident Notification form is available electronically. A copy is included at the end of this chapter.

The Grangeville Dispatch Center will notify, as appropriate, the Forest Health and Safety Officer, the Forest Supervisor, the Administrative Officer, local authorities, and the Regional Incident Dispatcher as directed in the Emergency and Disaster Plan for the Northern Region.

Idaho Department of Lands direction

Incidents on Idaho Department of Lands jurisdiction should be reported to the appropriate Area Supervisor. They, in turn, will either notify or request GVC to notify Chief-Bureau of Fire Management, Brian Shiplett, or Operations Chief-South, Kurt Houston (or their Actings).

PRELIMINARY INCIDENT NOTIFICATION

Incidents involving **Forest Service** employees and/or occurring on **National Forest Lands** or **roads**, must be *promptly reported* to the Grangeville Dispatch Center with the following information by telephone, radio, or IBM.

UNIT:		DATE OF INCIDENT:	
LOCATION:		TIME OF INCIDENT:

AFTER HOURS or WEEKENDS NOTIFY : 24 hour # for GVC 208-983-6800

25.4.4 REQUESTS FOR EMERGENCY MEDICAL ASSISTANCE

It is not uncommon for agency personnel to receive requests for Emergency Medical treatment or transport injured individual(s). Such requests should be promptly communicated to Grangeville Dispatch. The local Sheriff's Office will be contacted and provided with all information available. Sheriff's Office dispatchers have the information and capability readily at hand to contact the most appropriate resource. Many such requests are treated and transported by local ground EMS personnel. Other situations may require some type of air ambulance or air extrication. Within Grangeville Dispatch, the aircraft dispatcher will normally handle the incident and communication with the Sheriff's Office when the need for air transport is evident. The aircraft dispatcher is also responsible for clearing or coordinating any agency aircraft that may be in the vicinity of the victim.

Initial Attack dispatchers will usually handle and communicate any ground treatment and transport requests to the Sheriff's Office. The Duty Coordinator will maintain contact and share appropriate information with the Agency Administrator(s) and NRCC.

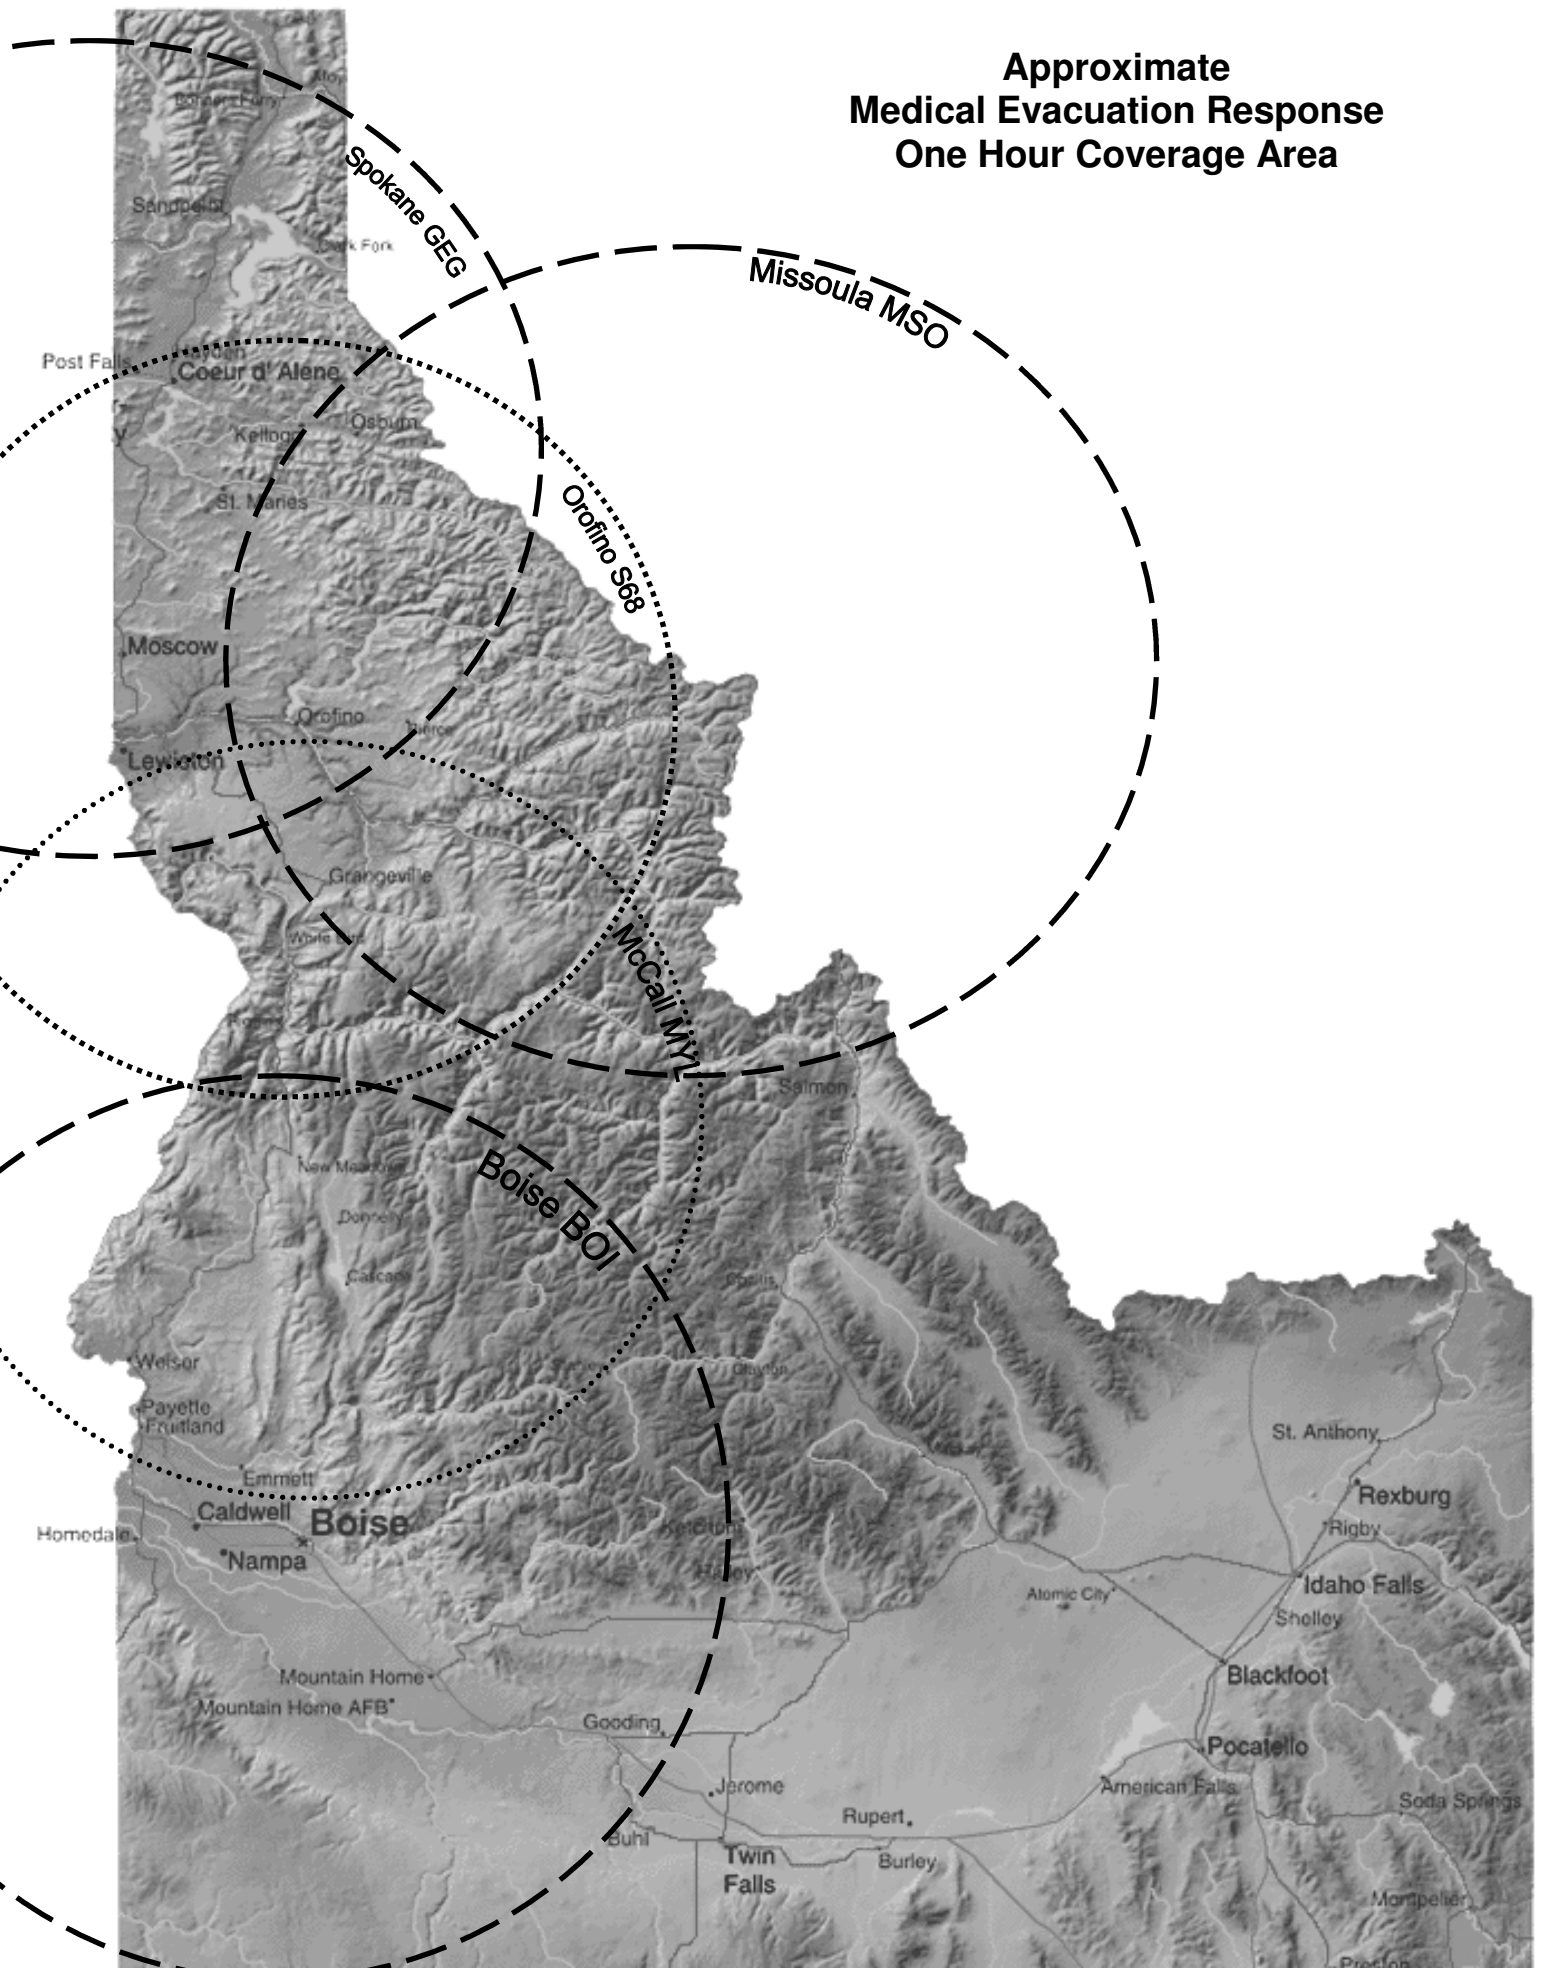

There are many circumstances where private parties are treated and transported by various EMS services without the involvement or knowledge of Agency personnel. In virtually all of these situations the EMS services have been requested by the Sheriff's Office. When the injury has occurred on Agency Managed lands, a courtesy call to Grangeville Dispatch Center by any individual with knowledge is always appreciated.

There may be instances where Agency personnel and/or aircraft are deemed capable and appropriate to address the needs of an injured Agency employee. This circumstance may most commonly occur during fire season when aircraft and firefighters are most available to support a trauma incident. These are of particular value when helispots must be created and/or lengthy packing of the individual may be necessary. Some Agency personnel also have EMS qualifications and trauma kits available to them. Even in these events when Agency treatment and transport is planned, the Sheriff's Office should receive a courtesy call regarding the incident. This communication can ease possible misunderstandings or duplication of effort.

The EMS request forms are available in the back of Chapter 80 of the Grangeville Dispatch Center Mobilization Guide. EMS aircraft information and travel times are presented for information only. The nature of the injury, other emergency activity, and flying conditions will be used by the Sheriff's Dispatcher to request the best resource to respond. Many local air transport situations are handled by Backcountry Rescue. They normally respond from Orofino with 2 EMTs and trauma equipment in a litter kit capable Bell 206 BIII or Bell L-3. This resource can frequently respond in our area when weather conditions do not permit flight over higher terrain from Missoula, Spokane, Boise or McCall.

Aircraft may require additional fuel to complete their mission. This is particularly true when weather or search time necessitates additional flight time.

**Approximate
Medical Evacuation Response
One Hour Coverage Area**

26 PREPAREDNESS LEVELS

Based on five classes of fire danger defined within the National Fire Danger Rating System, preparedness levels are used in prevention/education efforts to notify the public of the level of fire danger present. These classes also utilize percentiles of ERCs to determine level of resistance to control. At each level specific actions and staffing are determined to be on hand at the Area/Forest/District level to meet fire fighting efforts needed for control or other approved management action.

IDL Preparedness Levels and Direction can be found in the State Mobilization Guide Chapter 30 and Forest Service Preparedness Levels are contained within the Clearwater/Nez Perce Fire Plan.

CHAPTER 30 - ORGANIZATION

CONTENTS

31 INCIDENT SUPPORT ORGANIZATION.....30-1

31.1 EXPANDED DISPATCH

32 DISPATCH ORGANIZATION.....30-1

32.1 NORMAL OPERATIONS

CHAPTER 30

31 INCIDENT SUPPORT ORGANIZATION

31.1 EXPANDED DISPATCH

In the event of large or multiple project fires, the Zone dispatching organization will be expanded as conditions warrant. All functions will be broken into two 12-hour shifts. See the GVC Expanded Dispatch Plan, located in the Dispatch Center office.

32 DISPATCH ORGANIZATION

The Grangeville Interagency Dispatch Center (GVC) is both the Initial Attack Dispatch Center and a Zone Dispatch Center as defined within the Northern Rockies Mobilization Guide (Sec 34.1 and 34.2) The initial attack functions serve the Idaho Department of Lands Areas of Maggie Creek and Craig Mountain; the Clearwater Forest Districts of North Fork, Powell, and Lochsa; and the Nez Perce Forest Districts of Moose Creek, Salmon River, Clearwater and Red River. The Zone Center additionally supports Clearwater-Potlatch Timber Protective Association, Bureau of Land Management Cottonwood Field Office, Nez Perce Park, and Nez Perce Tribe.

32.1 NORMAL OPERATIONS

GVC will be staffed 7 days a week during fire season from 0700 to 1800. The Center Manager may extend this staffing as situations require.

Dispatch 24 / 7 number: **(208) 983-6800**

When contacted the after hours service will in turn contact the GVC “On Call” dispatcher.

For other phone number see **Chapter 50 - Directory**

White Bird Battlefield description

42 STATE AGREEMENTS

- 42.1 **State of Idaho**
 - 42.1.1 Idaho Department of Lands
 - North Central Idaho Operations Guide for SEATS
 - North Central Idaho Type III Teams Operating Plan
 - Northwest Wildland Fire Protection Agreement (Northwest Compact)
 - Can be found in Appendix "O" of Northern Rockies Mobilization Guide.
 - 42.1.2 Department of Parks and Recreation
 - Palouse District, CWF and McCroskey State Park
- 42.2 Clearwater-Potlatch Timber Protection Association
 - Memorandum of Understanding on Radio Frequency Sharing
- 42.3 Salmon River Rural Fire Department
 - Cooperative Fire Protection Agreement

Copies of all agreements are in two binders located in the Grangeville Interagency Dispatch Center. One is titled "Agreements with Other Forests and Other Agencies", the other is titled "Co-op Agreements IDL, ID County Rural Fire Departments."

A listing of agreements with federal agencies, states and other agencies can also be found in the Fire Management Action Plan.

43 OTHER AGREEMENTS

43.1 U.S. WEATHER SERVICE

43.1.1 Weather Observations

When required, Districts and lookouts should have their daily weather observation ready for the GVC by 1300 each day. These observations will be entered into WIMS by the Intelligence Dispatcher.

The output indices concerning the daily fire danger will be obtained by GVC. The indices will be available to users via the Zone Dispatch Web page.

43.1.2 Forecasts

Weather forecasts are received from Missoula Weather Service at approximately 0800 and 1530 daily during the fire season. The morning forecast will be read over the radio at 1000. Significant updates will also be broadcast.

43.1.3 Spot Forecasts

These are available upon request to the Missoula Weather Service. Requests can be relayed to the Missoula Weather Service via their web page. Fire weather forecasters are on duty during the fire season from 0600 - 1700 PDT.

43.2 LAW ENFORCEMENT AGENCIES

Clearwater County Sheriff:	208/476-4521
Idaho County Sheriff:	208/983-1100
Latah County Sheriff:	208/882-2216
Lewis County Sheriff:	208/937-2447
Nez Perce County Sheriff:	208/799-3131
Missoula County Sheriff:	406/721-5700
Benewah County Sheriff:	208/245-2555
Shoshone County Sheriff:	208/556-1114
Valley County Sheriff:	208/382-7150

62 CREWS**62.1 Minimum Crew Standards for National Mobilization****(NWCG#004-2008)**

Minimum Standards	Type 1	Type 2 with IA Capability	Type 2
Fireline Capability	Initial attack/can be broken up into squads, fire line construction, complex firing operations(backfire)	Initial attack/can be broken up into squads, fireline construction, firing to include burnout	Initial attack, fireline construction, firing to include burnout
Crew Size	18-20		
Leadership Qualifications	Permanent Supervision Supt: TFLD, ICT4, FIRB Asst Supt: STCR, ICT4, 3 Squad Bosses: CRWB(T), ICT5 2 Senior Firefighters: FFT1/Squad Boss and ICT5	CRWB 3 ICT5	CRWB 3 FFT1
Bilingual Requirement	CRWB and FFT1’s must be bilingual (able to read and interpret) in language of crew.		
Experience	80% 1 season	60% 1 season	40% 1 season
Full Time Organized Crew	Yes (work and train as a unit 40 hrs per week)	No	
Communications	5 programmable radios	4 programmable radios	
Sawyers	3 agency qualified		None
Training	80 hours annual training	Basic firefighter training and/or annual firefighter Safety refresher	
Fitness	Arduous		
Logistics	Crew level agency purchasing authority	No purchasing authority	
Maximum Weight	5100 lbs		
Dispatch Availability	1 hour (available nationally)	Variable	
Production Factor	1.0	.8	
Transportation	Own transportation	Transportation needed	
Tools & Equipment	Fully equipped	Not equipped	
Personal Gear	Arrives with: Crew First Aid kit, personal first aid kit, headlamp, 1 qt canteen, web gear, sleeping bag		
PPE	Arrives with: Hardhat, fire resistant shirt/ pants, 8” leather boots, leather gloves, fire shelter, hearing/ eye protection		
Certification	Must be annually certified by the local host unit Agency Administrator or designee prior to being made available for assignment.	N/A	

All crews dispatched by GVC will be/have:

- Weighed and a manifest forwarded to GVC;
- A lunch with them, unless otherwise instructed;
- All crew members will have a picture ID;
- Briefed and checked for hazardous materials compliance, if traveling commercially;

- Provided with any available fire behavior information; and
- Check in daily with GVC while in travel status, if traveling by ground transportation.

62.2 **INTERAGENCY REGULAR CREWS**

2009 USFS/IDL/BLM Grangeville Interagency Type 2 Crew Dispatch Procedures

The following procedures are to be followed when Grangeville Interagency Dispatch Center receives a request to fill a resource order for a Type 2 Crew.

Grangeville Interagency Dispatch Responsibilities:

- ✓ Dispatch will check the Clear/Nez Situation Report/GVC Resource Status Page to see if 20 individuals are available for a type 2 crew assignment.
- ✓ Dispatch will check with the Center Manager/Zone Duty Officer to confirm that the zone has a Type 2 Crew available each day.
- ✓ Dispatch will assign a crew boss trainee from a list generated each spring by the Fire Managers and the FQRC.
- ✓ Dispatch will contact the Area/District Duty Officers and inform them of the resource order. If a local Area/District is hosting the fire, that local Area/District will still be included in the crew call.
- ✓ Dispatch will determine meeting time and place for crew assembly.
- ✓ Dispatch will arrange for delivery of sack lunches for the crew.
- ✓ Dispatch will provide the crew boss with a briefing package to include: crew manifest, resource order, travel plan, maps, and fire information, may be included if available.
- ✓ For current T2 Crew rotation information / coordination, Area/District Duty officers may contact the Initial Attack Supervisor, Logistics Supervisor, or their actings.

Area/District Duty Officers Responsibilities:

- ✓ The Area/District Duty Officer at the top of the rotation will be responsible to provide/identify the Crew Boss.
- ✓ The Area/District Duty Officers will provide the names of the individuals from each district to Dispatch following the established procedures listed below.
- ✓ The Area/District Duty Officers to complete the daily situation report and provide this information to Dispatch to indicate the availability of district resources for a Type 2 Crew assignment.
- ✓ The Area/District Duty Officers will provide the names, gender, (**Dispatch will need to know how many seasons of experience a crewmember has**) and vehicle #'s to dispatch within 30 minutes maximum after receiving the order. (Dispatch Centers have a maximum of 30 minutes to commit to filling all requests or decline external orders).

- ✓ The Area/District Duty Officers will ensure that all resources have a current incident qualification card and have completed the Work Capacity Test before assembling. (Crewmembers not meeting this standard may be sent home)
- ✓ Area/District Duty Officers will prioritize Squad Bosses, ICT5's and Sawyers on their respective unit.
- ✓ Area/District Duty Officers will be available by telephone to receive requests from dispatch – if dispatch is unable to contact the duty officer that district will lose its position in the rotation for that crew call. This is essential in order to meet the Regional 30 minute fill or kill policy.

All Type 2 crew orders will meet the minimum requirements for mobilization as listed in the National Mobilization Guide. Refer to the National Mobilization Guide: Chapter 60 – Overhead / Crews, Pg. 353 – subchapter 62.2 “Minimum Crew Standards for National Mobilization”. http://www.nifc.gov/nicc/mobguide/Chapter_60.

The 18 positions on the crew will be allotted with the state and BLM areas providing 2 people and the FS providing 3. Sometimes the last FS district will only provide 2 individuals. **The rotation is listed below:**

<u>Area/District</u> <u>Equipment</u>	<u>Individuals</u>	<u>Positions</u>	<u>Vehicle</u>
1) Craig Mtn. (IDL) Handtools	2	Squad Boss/ICT5/Sawyer	6-pack Saw &
2) Clearwater (1704) Handtools	3	Squad Boss/ICT5/Sawyer	6-pack Saw &
3) Northfork (0503) Handtools	3	Squad Boss/ICT5/Sawyer	6-pack Saw &
4) Maggie Cr. (IDL)	2	FFTR's Saw & Handtools	6-pack
5) Red River (1708)	3	FFTR's Handtools	
6) Lochsa (0505)	3	FFTR's Handtools	
7) Moose Creek (1706)	2	FFTR's Handtools	
8) Cottonwood (BLM)	0	FFTR's	
9) Salmon River (1701)	0	FFTR's	
10) Powell (0506)	0	FFTR's	

The Clear/Nez Fire Zone has 7 Forest Service districts, 2 State Areas and one BLM area with initial attack firefighters that will comprise the Grangeville Interagency Type 2 crew: Salmon River (1701), Clearwater (1704), Moose Creek (1706), Red River (1708), Northfork (0503), Lochsa (0505), Powell (0506), Craig Mtn., Maggie Creek and Cottonwood. The resource order will be filled with individuals from these Area/Districts “first”. If the order cannot be filled from the Area/Districts, the GAC smokejumper base will be considered to fill the remaining positions on the crew.

NOTE: Palouse R.D. (0502) is not considered in the rotation because the District has a Type 2 crew that is available for off-district assignments as determined by the DFMO.

NOTE: Helitack are considered district resources and are included in the Lochsa and Clearwater Districts.

The initial rotation will be set up with the area/districts drawn randomly out of a hat by the Zone Coordinator in an alternating sequence with 1 district from the Nez Perce N.F. and 1 district from the Clearwater N.F. and one area State/BLM being drawn. The list will begin the following year with this year's top four at the bottom of the new list..

The list will rotate only after an assignment. The list will not rotate weekly, monthly, annually, etc. After an assignment, the top 4 slots will rotate to the bottom of the list; this will provide each district an opportunity to provide leadership on the Type 2 crew.

An assignment: defined as arrival on the fireline or at their destination of staging for a minimum of 1 shift.

The list is valid for the entire season: Pre-season, fire season, and post-season.

If any area/district is unable to supply the number of individuals that is called for on the crew rotation the Dispatcher on Duty will need to finish filling the crew. If the crew cannot be filled utilizing area/district individuals then the smokejumpers or other units such as neighbors will be contacted to check availability.

If an area/district is indicating "0" individuals available and the daily situation report indicates other districts have 20 or more available, the districts showing "0" will not be contacted to fill out the crew.

The crew boss trainee will be determined utilizing the priority list developed pre-season.

The Crew Boss and Crew Boss Trainee positions will NOT be considered part of the Area/District total number of individuals.

A regular Type 2 Crew request must include 3 squad boss (FFT1) qualified individuals. The number 1-3 area/districts on the rotation list will be expected to provide squad bosses and the priority for these positions will be determined by the area/district duty officer. The crew request may be for initial attack and the first three districts on the list will be expected to provide individuals who are ICT5 qualified as well as agency qualified sawyers. If one of the districts in positions 1-3 cannot provide a squad boss, ICT5, and/or agency qualified sawyer, the area/district in the number 4 position will provide the squad boss and if this area/district cannot supply the squad boss it goes to the area/district in the #5 position, etc.....

The first 4 area/districts on the list will provide a 6 pack for crew transportation unless the request is for an alternate form of transportation (i.e. chartered bus).

The first 4 area/districts on the list will supply 1 chainsaw with saw gear and all areas/districts will provide handtools for their individual firefighters.

The Crew Boss, Crew Boss (t), and 3 squad bosses / ICT5's will have radios provided by the home unit. A minimum of 4 radios on the crew, 5 if the crew has a crew boss trainee, will be needed.

NOTE: The resource orders for Type 2 crews are rotated among 4 entities/units:

This rotation will apply in most cases excluding name requests, special needs and crew types ordered.

- 1.) Grangeville Interagency Crew
- 2.) Nez Perce Tribal Crew
- 3.) Idaho Correction Institute Orofino (ICIO)
- 4.) Palouse Crew

A list of crew boss trainees is included below:

2009 CRWB (T) Priority List

<u>NAME</u>	<u>DISTRICT</u>	<u>PRIORITY</u>
Meg Fluharty	1706	1
Harley Hamman	1708	1

62.3 NEZ PERCE TRIBE CREWS

Type 2 or Type 2 IA crews can be provided by the Nez Perce Tribe. They can also provide multiple camp crews. For 2009 the Tribe will provide their crews with all equipment and gear necessary for an assignment. They will also arrange for lunches and transportation. To request Nez Perce Tribe crews call the Lapwai main number to contact the Duty Officer.

62.4 INMATE CREWS (ICIO)

The Idaho Department of Corrections in Orofino with the sponsorship of CPTPA can provide up to 4 Type 2 crews. These crews come equipped with lunches, transportation, tools, and communications. Dispatch by calling CPTPA as identified in Chapter 50 of this guide.

62.5 **SMOKEJUMPERS**

Thirty smokejumpers and one Twin Otter contract aircraft are assigned to the Grangeville Air Center. Tour of Duty is generally 0900 – 1800 PDT. The aircraft is available from 5/30 through 9/21. All smokejumper requests are made to the GVC Dispatch Center in Grangeville via ROSS or on Smokejumper IA Form R1-FS-5700-3a 07/08)

2009 Grangeville Smokejumpers

---------------	---------	---------	-------	--------	--------

Once a Team has had an out-of-Geographic-Area assignment, an asterisk will be placed beside their name on the NRCC home web page when they come into rotation, indicating they have had an assignment. The other Team in 2-hour will be given the opportunity first. In the event that both Teams in 2-hour have had an out-of-Geographic-Area assignment, the closest Team will be sent. The closest Team will be determined by NRCC based on physical location if driving, or proximity of jetport(s) if flying.* In date column Denotes Monday Holiday team will rotate on Tuesday.

71.4 RAWS

The Clearwater and Nez Perce Forests operate 13 permanent and 4 portable RAWS. In addition, weather from 3 stations on the West Fork District is included in the daily RAWS and INDICES reports. The stations are as follows:

	<u>ID</u>	<u>NAME</u>	<u>LOCATION</u>
	100603	POTLATCH	POTLATCH RANGER STATION
	100606	SHOCK	PALOUSE DISTRICT. STRYCHNINE RIDGE (SEC. 29 T42N
R2W)			
	100708	KELLY	KELLY FORKS WORK CENTER
	100711	PIERCE	PIERCE WORK CENTER
	100714	DENT	DWORSHAK RESERVOIR AT DENT
	100717	EAGLE	NORTH FORK DISTRICT. EAGLE POINT (SEC 23 T40N R7E
5700')			
	100791	TESS	PORTABLE
	100799	MARIAH	PORTABLE
	101013	FENN	FENN RANGER STATION
	101028	MOOSE CREEK	MOOSE CREEK RANGER STATION
	101031	POWELL	POWELL POND AREA
	101037	SLATE CREEK	SLATE CREEK RANGER STATION
	101045	RED RIVER	RED RIVER RANGER STATION
	101049	ROUNDTOP	ROUNDTOP MOUNTAIN (SEC. 21 T37N R15E--6550' ELEV)
	101050	SOUTHFORK	BLACKTAIL BUTTE
		CECILIA	PORTABLE
		OPHELIA	PORTABLE

THESE LAST 3 STATIONS ARE ON THE WEST FORK DISTRICT ON THE BRF.

101311	SKULL GULCH	45 20.12 x 114 28.05
242901	DARBY	46 01.62 x 114 10.33
242907	WEST FORK	45 49.05 x 114 15.47

Indices from these stations are posted daily during fire season on the Grangeville Interagency Dispatch Center website at www.fs.fed.us/r1/nezperce/gvc.

Other stations:

101100	Pittsburg Landing	Maintained by the Wallowa-Whitman NF
	Corral Creek	Maintained by Cottonwood BLM
100901	Mission Creek	Maintained by Nez Perce Tribe

72 **BASE UNITS AND CACHE VANS**

There is a Regional 250-person camp stored in a van and located by the Nez Perce Forest warehouse. A tractor to pull the van must be obtained through Acquisition Management.

Rations are stored in Grangeville on a year-round basis. Arrangements for meals must be made at the time the camp is ordered. Additional firefighting equipment is stored in the Forest warehouse.

On occasion, the Idaho Department of Lands may stage a cache van in Grangeville at the Nez Perce National Forest Supervisor's Office warehouse.

AVIATION MANAGEMENT

PLANNING. Any activity involving aircraft or aviation resources also becomes an aviation project. Review the Forest or State of Idaho Aviation Plan before planning aviation projects. Special projects may require approval of an Aviation Project Plan. All projects will require use of qualified personnel and approved aircraft.

1. Consult the Forest or State Aviation Officer for assistance in determining aviation needs.
2. Request aircraft procurement and flights through the Grangeville Dispatch Center.
3. The primary contact for District or Area aviation needs is the District Fire Management Officer or the Fire Warden respectively.

Grangeville Air Center Aviation Mishap Plan- 2009

Purpose:

The Grangeville Air Center experiences considerable use by Agency, Contract, and General Aviation from June through September. Airport use increases dramatically with increased fire activity on the Zone. The possibility for aviation mishap to occur on take-off or landing increases with airport use and should be planned for.

Roles and Responsibilities for Aviation Mishap:

Pilot:

Declares emergency and informs Dispatch and/or Grangeville Air Center via FM or Unicom radio as to nature of emergency and intentions to land/ not land at GAC

Action: CALL 911 CALL DISPATCH: 983-6803/6804/ 6800

*Respective leads for each department at Air Center rally in the SMJ Ops office to coordinate duties and responsibilities:

1. SMJ- Emergency IC and response crew
2. ATBM- Office assist and Ramp Mgt
3. Helitack- Helipads and response crew
4. Aviation Mgr- Fire Staff, Dispatch

Air Center Office Personnel:

Identify who will monitor radios and who will answer phones. **Document** all transmissions

- 1) Coordinate with Dispatch and notify air center personnel on site as to nature of emergency and action required.
- 2) Dispatch will proceed with their Aviation Emergency Checklist outlined in the Grangeville Interagency Dispatch Mobilization Guide.
- 3) Notify Airport Manager, Gene Meinen: Office (209-926-4471) and Airport Fueler, Norman Lowe (983-1565) as to nature of emergency.
- 4) Continue to monitor airport frequency (Unicom 122.9) to notify General Aviation of emergency.

I.C. or Lead Emergency Coordinator:

Will Coordinate and direct the incident until Fire Dept. and or ambulance arrive – then coordinate with them to support and control the site.

- 1) Ensure ground personnel are fully **Nomexed** with **gloves, hardhats, and PPE.**
- 2) Designate personnel to transport and operate emergency equipment, specifically fire extinguishers; Tri-Max foam extinguisher, and crash rescue kit.
- 3) Designate medical lead to transport and utilize trauma kit and first aid supplies.
- 4) Carry FM and AM radios and cell phone. Coordinate frequencies to be used.

Considerations for Ground personnel responding to aviation mishap:

1. Response is limited to saving lives and preventing injury to aircraft crew, passengers, and emergency response crews until fire dept. and/or ambulance arrive.
2. Evaluate the Scene for safety of response personnel!
3. Maintain and control 500 ft. radius safety circle for unauthorized or unnecessary personnel.
4. Keep frequencies clear for IC directions.
5. Keep ramp areas clear of all vehicles and aircraft unless directly responding to emergency.

Emergency Equipment Available /Recommended equipment needs for response:

Fire extinguishers:

1. 30 gallon Tri-max Foam Fire Extinguisher: located on ramp between SEAT loading pit and SMJ aircraft parking
2. Fire extinguisher with crash rescue kit: located at Helipad 1
3. Fire extinguisher located at Smokejumper Tower exit door.
4. Wheeled cart Fire extinguisher located at SEAT fueling trailer on north side of FS ramp
5. Various hand held extinguishers located in all buildings close to doorways

Other Needs:

1. Extra handheld AM radios available in Air Tanker office
2. Cell phone number identified to Air Center Office and Dispatch
3. Vehicles for quick transport of air center personnel to taxiway or end of runway
4. Trauma kit, Ked/Sked, and O2 cylinders should be loaded in vehicles for same.
5. Handheld AM radio will be located at the SMJ Ops desk strictly for emergencies
6. Approximately 8-10 Nomex flight suits are available in SMJ spotter cabinet for quick Nomex needs
7. When incident is controlled document with photos where and when appropriate

Air Center Personnel will receive annual training on Tri-max foam fire extinguisher and crash rescue kit.
